

Professional Summary

Data Engineer with half a decade of experience in Power BI, SQL, PySpark, Databricks and Azure Data Engineering services. Skilled in transforming raw datasets into business insights using data pipelines, modelling, and visualization. Seeking to leverage analytical expertise to drive data-informed decisions.

Skills

- Databases: SQL (MySQL, SQL Server)
- Programming: Python, PySpark
- Workflow Orchestration: Apache Airflow
- Containerization (Docker)
- Cloud & Big Data: Microsoft Azure (Synapse, ADF, Data Lake), Apache Spark, Databricks
- AI Tools & Agents (Lang Chain, Open AI, Agentic AI)
- Data Visualization: Power BI, SSRS

Work Experience – Wipro Ltd

DATA ANALYST– Optum Technology July 2021 – Current

- Designed and orchestrated **end-to-end meta-data driven data pipelines** using **Azure Data Factory**.
- Implemented scalable data transformations using **Azure Databricks, SQL and Python** following **Medallion Architecture**
- Managed **schema evolution and schema drift** through dynamic mappings and validation
- Applied **CDM** based modelling, used **SCD Type II** to maintain historical data accuracy.
- Optimized Spark workloads by resolving **data skew and performance bottlenecks, reducing processing time by 40%**
- Monitored pipelines, analyzed logs, KPIs and performed **root cause analysis** to ensure data quality and SLA compliance.
- Collaborated with cross-functional teams to analyze alert escalation trends and minimize business risks.
- Designed and maintained 15+ interactive **Power BI** dashboards to track KPIs and SLA performance across teams.
- Automated Excel processes using complex **DAX** measures and data modelling, reducing report generation time by 60%.
- Integrated Service-now data with Power BI through REST APIs, ensuring real-time visibility of incident and SLA metrics.
- Developed and maintained weekly performance reports, improving team productivity tracking by 50%.

Projects

OLYMPIC DATA ANALYTICS – Microsoft Azure November 2024

- Built an end-to-end Azure data pipeline using **ADF, Databricks, Synapse, Pyspark and Power BI**.
- Processed and cleaned Olympic datasets to generate interactive insights on medal trends by country and athlete.

JOB MARKET ANALYTICS – BITS Pilani October 2025

- Engineered a **scalable ETL pipeline** using **Apache Airflow, Docker, and SQL Server** to automate data workflows.
- Processed **API data with Python (Pandas)** and created **Power BI dashboards** for actionable insights.

Education

Master of Technology – Computing Systems and Infrastructure – BITS Pilani Nov 2025
Bachelor of Science – Computer Science -- Osmania University APRIL 2021

Certifications

Azure Data Fundamental (DP – 900) November 2023
Azure Fundamental (AZ – 900) February 2024
Anthropic Claude (L100, L200, L300) March 2026
Databricks Fundamentals April 2026
